REUBEN CORSON.	- (•	•	•	113313tailt Engineers

REPORT OF THE SELECTMEN.

FELLOW CITIZENS OF HYDE PARK:-

At the last annual town meeting, twelve prominent citizens were appointed to confer with the Selectmen and School Committee in regard to the appropriations for the current year.

The result of this conference was the *unanimous* recommendation that the following amounts should be appropriated to be expended by the Selectmen:—

For	permanent in	prove	ments							\$10,000
"	sidewalks									10,000
"	incidental exp	enses								4,500
66	outstanding	bills	and	neces	ssary	repa	irs	on	the	
	streets									5,000

And we have given our best judgment in the expenditure of the same.

SUPERINTENDENT OF STREETS.

D. W. Phipps was appointed Superintendent of Streets, at a salary of \$1,000 per year. The great benefit derived from his management of the work, and the thorough and impartial manner in which he has performed all the duties pertaining to the office, will, we trust, secure to the town in the future the services of some competent person to have the entire care and building of our streets.

SURVEYING STREETS.

With an outlook for some practical system of sewerage, which must be provided for within a few years, and with a view of establishing a *permanent* grade on all of our principal

streets, Percy M. Blake, a civil engineer of marked ability and large experience, was employed to survey at least twenty miles of streets at \$100 per mile.

All work performed during the year has been done with the above objects in view, and in accordance with the survey and grades established by him. And when his work is fully completed, we trust that it will be entirely satisfactory to the town.

SIDEWALKS.

Bids were solicited and received from various parties for furnishing curbstone, setting the same, and laying the concrete. The contract for curbstone was awarded to J. E. Piper, at 57 cents per lineal foot, delivered on the streets; and setting the same, to J. E. Piper and F. Gore, at 13 cents per lineal foot, and the concreting to Kirk W. Dodge, at 50 cents per square yard.

By a careful estimate made in consultation with our Engineer, and with the full belief that abutters could be assessed for one-half the cost of construction, as they have been in previous years, instead of not above one per cent. of the last assessed valuation, which is a statute law, we expected to build with the sum appropriated, together with the amount collected from assessments, the following line of sidewalks: Complete the work on the west side of West River street to Gordon avenue; both sides of Gordon avenue to Austin street; the east side of Central Park avenue from River street to Walnut street; both sides of Maple street to Pine street; one side of Oak street; both sides of Hyde Park avenue to Everett street; one side of Central avenue to West street; the east side of East River street to Arlington street; both sides of River street and Fairmount avenue, between the Providence Railroad bridge and the N. Y. & N. E. R. R. Crossing; both sides of Fairmount avenue to Highland street; the west side of Beacon street to Metropolitan avenue; the west side of Water street to Dana avenue; one

side of Arlington street, between the Hazelwood station and Hyde Park avenue.

The following statement is taken from the last town report in regard to the side-walk on West River street:—

"Although every arrangement had been entered into with Mr. K. W. Dodge, for concreting the entire distance where stone has been located, and having arranged for the stock, he will be prepared to fulfil his part of the agreement promptly in the early spring."

Hence work was commenced at the corner of *Cleveland* and *West River* streets. Cost of construction to Gordon avenue, \$1,271.68. Assessed for \$356.07.

GORDON AVENUE.

Sidewalks have been built on both sides of this avenue. Cost of construction, \$1,972.29. Assessed for \$699.53.

RIVER STREET AND FAIRMOUNT AVENUE.

Between the Boston and Providence Railroad Bridge and the N. Y. & N. E. R. R. crossing.—A permanent grade has been established and a continuous line of sidewalk built between the above-named points. Cost of construction, \$1,063.43. Assessed for \$483.72.

MAPLE STREET.

A sidewalk has been built on both sides of this street, from Everett square to Oak street, and on the west side from Oak street to the Unitarian Church. Cost of construction, \$1,223.75. Assessed for \$561.22.

OAK STREET.

As the estate of W. J. Case is situated on both Maple and Oak streets, the sidewalk was completed in front of his property, and as the street had to be excavated to conform to the grade given by the engineer, it became necessary to put down a walk on the opposite side, in front of the estate of

William A. Wood. Cost of construction, \$353.47. Assessed for \$168.20.

HYDE PARK AVENUE.

A sidewalk has been built on both sides of this avenue, from Everett square to Everett street, and on the west side from Everett street to Clay street. Cost of construction, \$1,402.29. Assessed for \$533.40.

CENTRAL AVENUE.

A sidewalk has been built on the west side of this avenue, from Everett square to Webster street, and on the east side from Webster street to West street. Curbstone has also been set on the east side, from Everett square to Winthrop street, a distance of about 300 feet. Cost of construction, \$2,050.15. Assessed for \$659.51.

EAST RIVER STREET.

A sidewalk has been built on the east side of this street, from Everett square to Arlington street. Cost of construction, \$2,446.96. Assessed for \$809.53.

FAIRMOUNT AVENUE.

A sidewalk has been built on the north side of this avenue, from the Neponset river to Beacon street. Cost of construction, \$291.60. Assessed for \$97.00.

WATER STREET.

About 300 feet of curbstone has been set on this street, but no concreting has been done.

BEACON STREET.

A sidewalk has been built on the west side of this street, from Fairmount avenue to the estate of George M. Rice. Cost of construction, \$1,761.55. Assessed for \$501.97.

RECAPITULATION.

Entire cost of sidewalks	\$13,837	17
One-half of this sum (the amount we supposed could		
be assessed, as was done on the sidewalks built in		
1884 and 1885	6,918	58
Actual legal assessment, which is to be paid to the		
Town Treasurer	4,871	15
Difference between one-half cost of construction and		
legal assessment	2,047	43

The amount of these two sums—\$4,871.15 and \$2,047.43 equals \$6,918.58—approximates the special appropriation, \$7,000.00 asked for at the special town meeting held on the 17th of November, 1886.

We very much regret that we could not complete the sidewalks on Fairmount Avenue and Water Street, and we earnestly recommend that our successors give them *prompt* attention.

PERMANENT IMPROVEMENTS.

Early in the year a communication was received from Mr. Hamblin requesting the Selectmen to remove within *thirty* days the two twelve inch pipes used for carrying off surface water, from Fairmount Avenue, west of the railroad, to the Neponset River.

This request was accompanied by an agreement signed by the former Selectmen to perform the same on thirty days notice. At a large expense, a twenty-four inch Akron pipe was laid from west of the N. Y. & N. E. R. R. Crossing on Fairmount Avenue to the river, which will in the future carry all surface water naturally coming from the hill on Oak Street, and also from all that portion of Fairmount Avenue between Everett Square and the railroad crossing.

For several years it has been a serious question how to dispose of the surface water of Walter Street, East Winthrop Street, and that portion of East River Street between Everett Square and Walter Street, and since the removal of the lumber yard of S. B. Balkam & Co., to its present location, it became *necessary* to take it from the foot of Walter Street underneath the N. Y. & N. E. R. R. to the Neponset River.

Permission was granted by the Railroad Corporation to lay a twenty-four inch pipe underneath their tracks, which has been done at a large expense on condition that the town would build a drain to the river according to a plan and specifications to be furnished by them.

This plan is now on file in the town clerk's office, but did not reach us until after the ground was frozen, so that the work could not be done this year.

This work must be completed early the coming year, else the town will forfeit all privileges thus far gained.

A *vast* amount of work has been done by the Superintendent of Streets in *regrading* the streets where curbstone has been set—supplying sand and paving stone for paving gutters, and adjusting the claims of abutters.

PAVING.

Gutters have been paved on both sides of River Street and Fairmount Avenue between Central Park Avenue and the N. Y. & N. E. RR. Crossing. Both sides of Maple Street from River Street to Oak Street. West side of Maple Street from Oak Street to the Unitarian Church. Both sides of Hyde Park Avenue from River Street to Winthrop Street. West side of Central Avenue from Everett Square to Winthrop Street. East side of East River Street from Everett Square to Walter Street. North Side of Fairmount Avenue from the river to Beacon Street. West side of Beacon Street from Fairmount Avenue to Milton Street. East side of Highland Street from Fairmount Avenue to near Milton Street. About four hundred feet upon Metropolitan Avenue, and about two hundred feet on the north side of Perkins Avenue.

CROSS WALKS.

Granite Crosswalks have been put across the following streets:—

Webster Street at the junction of Central Avenue. Everett Square from Central Avenue. River Street at the junction of Hyde Park Avenue. Hyde Park Avenue at the junction of River Street. River Street at the junction of Central Park Avenue, and both sides of Central Park Avenue at its junction with River Street.

Approximate cost of the above work is as follows: -

Pay Roll		\$5,000.00
Granite for Crosswalks, Paving	Stone,	
and Circle around Flagstaff		1,100.00
Paving		1,000.00
Akron Pipe		
Surveying Streets		1,400.00
Land on Central Avenue .		. 300.00
Street Roller		300.00
Repairing Flagstaff		. 125.00
Repairing Fences of Abutters		. 275.00
		\$10,000.00

HIGHWAYS.

Owing to the great freshet in February and also to the fact that the contractor for laying the water pipes neglected to make proper repairs, we found the streets in an unusually bad condition, and in order to restore them, even to their former condition, required a large expenditure of the fund appropriated for highways.

The first work of the year was done in the Fairmount District by placing not less than twelve hundred loads of gravel east of the Neponset River. Corresponding work was also done in the central section of the town, including Pierce street, Davison street, East River street, Arlington street, Elmstreet,

West River street, Central avenue, Winthrop street, Lincoln street and Central Park avenue as far as Mother Brook.

Work of the same nature has also been done on West River street from Glenwood avenue to the Dedham line, the entire length of Business street, the entire length of Readville street, and certainly not less than two thousand and five hundred loads of gravel was placed on the streets in the Readville District. Central Park avenue from Mother Brook to Milton street, Milton street from the Dedham line to the Milton line, and Sprague street, all in the Readville District, are in need of like repairs.

It was the intention of the Selectmen to thoroughly rebuild Hyde Park avenue from the Boston line to Everett Square, and two large banks of gravel were purchased for this purpose, but before the work could be commenced the appropriated funds were so far expended that necessary repairs were simply made. We earnestly recommend that this street, with others in the Clarendon Hills District, including Metropolitan avenue and East River street, from the Butler School house to the Boston line, receive the careful consideration of the citizens and our successors.

We also wish to make particular mention of Gordon avenue and Central avenue.

The following in regard to Gordon avenue is taken from the last town Report:—

"Therefore the *final* part is left to our successors, and we hope it will be the *first* to receive their attention."

A large amount of money was spent on this avenue last year, but unfortunately the grade established would not carry the surface water into Stony Brook, hence our Engineer in re-establishing the grade carries the water into Austin street, and while the expense of rebuilding the avenue has been large, we trust that it will be satisfactory to the town.

CENTRAL AVENUE.

It was with much misgiving that we began the widening and rebuilding of this avenue.

A former Board of Selectmen commenced the work but left several important matters unsettled. We found the avenue varying from twenty-nine to thirty-eight feet in width between Everett Square and Everett street, and at an expense of nearly a thousand dollars for land have made it forty feet wide and established a grade that is fairly satisfactory to all parties concerned.

POLICE.

This Department has been under the skillful management of Officer Jenney and his assistants, and we believe that they have performed all duties in a *thoroughly* commendable manner.

For details see report of Chief of Police.

GUIDE POSTS.

Fifty chestnut guide posts and eighty sign-boards have been placed on the corners of the more prominent streets.

If the town could have twenty-five more guide posts and forty sign-boards, it would be completely supplied.

FIRE DEPARTMENT.

Last year the Selectmen appointed *five* engineers, and, because we believed the efficient management of the department required only *three*, it became our unpleasant duty to reduce the number accordingly.

A Hose-house has been built in the Readville District and is in the possession of the Department.

We believe that our Fire Department is well equipped and as efficiently managed as any in New England.

For details see Engineer's report.

STREET LIGHTS.

The streets have been lighted in the same manner and by the same parties as last year. Many complaints have been made of the unsatisfactory lights furnished by the Dedham & Hyde Park Gas Light Co., and we are of the opinion that the use of Electric Lights as a street illuminant would be a great advantage to both the citizens and town.

While in the Western States Electric Lights have been used for years, New England was somewhat conservative in their adoption, but as the advantages in the safety of travel upon the streets of cities and large towns was made apparent by the use of Electric illumination, New England has finally pronounced in its favor, and nearly one hundred of its cities and large towns are using Electric Lights on their streets.

ACTIONS AT LAW.

On the twenty-sixth day of April last, two suits of importance to the citizens and tax-payers, were commenced against the town: one by Abner G. Hill, in which he claimed damages in the sum of four thousand dollars; the other by Daniel W. Simmons, in which he claimed five hundred dollars. Both are citizens of Pembroke, Mass. These claims for damages grew out of an accident which occurred on the Central Park Avenue bridge over Mother Brook, on the evening of November 6th, 1885, by reason of the carriage, in which Mr. Hill was riding, colliding with one of the iron arches or girders, which project above the planking or covering of the bridge. As a result of this collision it was claimed that one of Mr. Hill's legs was broken, and that he was permanently injured; and that damage was done to Mr. Simmons' team in which he was riding at the time of the accident afore-We were advised that upon the claims and evidences of the plaintiff, the result of a trial in Court was somewhat uncertain; thereupon negotiations were commenced with a view of settling the case, providing terms could be agreed upon that in our judgment would be advantageous to the town; but we soon found that the margin was so great between what we felt at liberty to give and the lowest sum that would be accepted by the plaintiff in settlement, that we deemed it prudent to have the suits disposed of in Court. The two cases were tried together at the September sitting of the Superior court, at Dedham, before Judge Aldrich and a jury, and as a result of that trial, after lengthy deliberation by the jury, a compromise verdict was rendered for the plaintiff Hill in the sum of five hundred dollars, and for Simmons, in the sum of thirty dollars, as damages.

The plaintiffs' costs in these two suits amounted to \$135.07 making the total amount of the judgments in their favor \$665.07. The town paid \$157.20 to experts, engineers, and witnesses.

While the aforesaid suits were pending in Court, last summer, Henry W. Beckwith & Co., of Jamaica Plain, made claims for damages done to a horse, carriage and harness, on account of a collision, in the night time, on the same bridge that happened, as was alleged, in substantially the same manner as the accident heretofore described, and out of which grew the two suits aforesaid. Miss Carrie A. Seaver who was an occupant of the carriage of Beckwith & Co., at the time of this alleged accident, made a claim for damages to her wearing apparel. The parties making these claims brought suits against the town on the seventeenth day of last August, and entered the same at the Superior Court, at Dedham. various consultations and conferences with counsel, we found that these two last suits could be adjusted for \$235.62. This amount was paid to the counsel for the last named plaintiffs and the suits consequently disposed of.

During our term of service, the case James W. Bean vs. Hyde Park, where the plaintiff sought to recover about one

thousand dollars for alleged labor, was argued in the Supreme Court, and a final decision in favor of the town has been rendered by that tribunal.

NEW STREETS.

Petitions have been received from citizens: For the extension of Davison street from West street to Arlington street, and for the laying out of other streets as follows: Cleveland street from Child street to Brainard street; Brainard street from Cleveland street to Glenwood avenue; Beaver street from Cleveland street to Glenwood avenue; Arlington street from East River street to Pierce street, and Charles street (Readville District) from Readville street to the Boston & Providence Railroad; also, to have the name of this street changed to Damon street, as there is another Charles street in the Sunnyside District.

We should have been *glad* to have considered all of the above petitions, but it was impossible for us to get the plans from the Engineer in time to do so; therefore we refer the matter to our successors for their early consideration.

HEARINGS BEFORE THE COUNTY COMMISSIONERS.

During the year, the County Commissioners were petitioned to view and relocate East River street, from the Butler School to the Boston line; West street, from East River street to Hyde Park avenue; Fairmount avenue, from the easterly bank of the Neponset river to the N. Y. & N. E. R. R.

We understand that the Commissioners have directed their engineer to place suitable bounds on East River street; and Fairmount avenue, showing the present true location of these streets, between the points aforesaid; and according to their relocation, or bounds, the building on the southerly side of Fairmount avenue, between the river and railroad, projects into the street about five feet; and the citizens are at liberty to determine what action may be taken in regard to its removal. Surveys have also been amade on West street.

The Commissioners have also been petitioned to lay out Dana avenue as a County way, from Summit street to Brush Hill road, in Milton.

Various hearings were had before the same body, at which the town was represented, on petition of citizens in the Clarendon Hills District, and others, to construct a bridge over the Boston and Providence railroad at Metropolitan avenue; and we believe that whenever a bridge can be built at this point, that will be satisfactory to both the town and Railroad Corporation, that will not cost the town more than \$5,000, it will be for its best interests to provide for the same, and we make the same recommendation in regard to a bridge at White's Crossing.

BRIDGE STREET BRIDGE.

It was the intention of the Selectmen to build a bridge on oak piles, but on a careful examination by experienced bridge-builders it was believed that they could not be driven in this soil, hence we were obliged to build a more expensive bridge and ask for an extra appropriation of \$1,000, which we did at the last special town meeting.

We believe that this bridge (constructed by W. W. Hilton), is a substantial structure and a great credit to the town.

OUTSTANDING BILLS.

Only \$4,500 was appropriated *last* spring for incidental expenses, as against \$6,000 last year, and we have *approved* outstanding bills in this department to the amount of about \$900.

The excessive amount of snow this year has somewhat increased our expenses, and we have *approved* outstanding bills in this department to the amount of about \$1,000.

We have no knowledge of any other outstanding bills.

Our contract with the Engineer provides that the work shall be completed in about five months from April 1st, 1886, and as the work, at the present time, is not so far advanced as to be ready for our examination or acceptance, we are unable to give any definite information in regard to what further claims (\$1,400 having already been paid) the Engineer may have against the town.

Respectfully submitted,

DAVID PERKINS,
JOHN H. TUCKERMAN,
HOBART M. CABLE,
Selectmen.

HYDE PARK, Mass., January 31st, 1887.

Respectfully submitted,

HENRY B. TERRY, Town Clerk.

REPORT OF THE BOARD OF HEALTH.

The Board of Health takes pleasure in making *this* annual report. It is well known that two members have done the work for the past year, Dr. C. C. Hayes having resigned about April 1st. We have answered all calls by a personal inspection in every case. We congratulate the inhabitants upon the healthful condition of the stown.

For the year ending January 31st, there have been reported to us the following cases of contagious diseases: Diphtheria, five cases; scarlet fever, ten cases; typhoid fever, three cases, (with only one death; against diphtheria, twenty-four cases; scarlet fever, sixty-eight cases; typhoid fever, eighteen cases, (with four deaths,) for the year 1885.

We believe this decrease in sickness and death is due to a great extent to the introduction of pure water.

The Board has done but little that required the expenditure of the town's money. A few dogs have been buried, the ditch in the rear of Raymond's stable has been cleaned, and a hollow in the rear of Green street was filled.

The Board has discouraged the keeping of swine when consistent, and the usual number of permits has not been granted. There have been many calls upon the Board to remove swill We have tried the experiment of having it removed for its value, but it has proved a failure. We believe the next Board will be called upon to do this at the expense of the town.

We have been called upon to examine several wet cellars; we believe that all such should be cemented; it is the only remedy against sickness. A perfect system of drainage is very much needed.

No ashes, garbage, or dirt of any kind, should be allowed to remain in any cellar during the summer months; and pure

air should be allowed to circulate through the cellar at all seasons, in pleasant weather. Our experience teaches us that many cases of sickness might be avoided if the above suggestions were strictly complied with.

REGULATIONS.

Public Statutes, Chapter 80, Section 18.—The Board of Health of a town shall make such regulations as it judges necessary for the public health and safety, respecting nuisances, sources of filth and causes of sickness within its town. Whoever violates any such regulation shall forfeit a sum not exceeding one hundred dollars.

In accordance with the foregoing provision of law, this Board adopts the following regulations, which will be strictly enforced:—

REGULATION 1.—No person will be permitted to keep any swine within the limits of the town of Hyde Park without a written permit from the Board of Health.

REGULATION 2.—No person shall place, or cause to be placed, or by any means empty, or cause to be emptied, any sewage, the drainage of any sink or stable, or the contents of any cesspool or privy well, in or upon any public street or way of this town.

REGULATION 3.—No person shall remove, or carry in or through any of the streets, lanes or avenues, places or alleys, within the town of Hyde Park, the contents of any cesspool, vault, privy, or privy well, unless a permit be granted by the Board of Health.

Public Statutes, Chapter 80, Section 79.—When a physician knows that a person whom he is called to visit is infected with small-pox, or any other disease dangerous to the public health, he shall immediately give notice thereof to the Selectmen or Board of Health of the town; and if he refuses or neglects to give such notice, he shall forfeit for each offence not less than fifty nor more than one hundred dollars.

REGULATION 4.—The following diseases are considered contagious and dangerous to the public health: Small Pox, Diphtheria, Scarlet Fever and Typhoid Fever.

The Board intends, by personal supervision, to see that the above regulations are carried out, and desires the inhabitants of Hyde Park to assist in the work of frequently cleaning out the cesspools and removing all noxious matter from their premises.

Respectfully submitted,

GEORGE F. DOWNES, Chairman. JOEL F. GOODWIN, Secretary.

FIFTEENTH ANNUAL REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

The library has been open, during the past year, for five hours every day, except holidays and Sundays, up to Dec. 23d, when it was closed for reasons well known to the public. Doubts as to the stability of the building have existed in the minds of some ever since its erection; and, before the library was removed to its present quarters, the trustees took the precaution of having the building thoroughly examined by persons thought to be competent judges, and a number of changes made to render it more secure; as appears by the twelfth report of the trustees. But, when the building was officially inspected and pronounced unsafe for occupancy, we felt that we had no further option in the premises, and that a decent regard for the feelings and the security of the library's patrons compelled the immediate closing of the rooms. We sought for other suitable ones at once, but could find none. So we are forced to ask the public to wait until the repairs and changes, now in progress, shall be completed; which, under favorable circumstances, may be before this report is published. Of course, no rent will be expected for the rooms while thus unavailable. The librarians, during this time, will be busied in re-covering and rearranging books, making up lists of new books for publication in the local papers, writing up the accession and shelf catalogies, and in many other necessary details for which scant time is found during the busy hours of distribution.

Books having accumulated considerably in excess of the capacity of those shelves which could be easily reached from the floor, and the constant use of a step-ladder, to reach the higher shelves, being very onerous and somewhat dangerous to the librarians, and attended with delay, the trustees embraced an opportunity to secure, at a low price, a nearly new iron gallery formerly used by the late firm of Lockwood, Brooks & Co., at its book-store on Franklin street, Boston. This was purchased and put in place in our library rooms at a total cost of \$183.55; and by means of it all our shelf-room, and about one-fifth of our books, are now readily accessible, and the future needs of the library in that respect anticipated for a considerable period.

The number of volumes now in the library is 8702, of which 592 have been added during the past year; 482 by purchase, and 110 by gift. Of these books about 6000 titles are contained in the general catalogue compiled in 1881; from 1200 to 1500 are to be found in the two supplements since issued; the most of the remainder have been published in the local papers, from time to time. The necessity of referring to so many different sources for a knowledge of the books obtainable at the library is, undoubtedly, a limitation of its usefulness as well as an inconvenience to its patrons. The only remedy is a new catalogue, bringing the lists up to date, which would cost about \$900. It will be for the tax-payers to say when they think the necessity great enough to warrant the outlay.

The use of the library books by the scholars of the public schools, as supplemental to exercises in their class-rooms, continues to increase, and is one of the gratifying benefits conferred by a public library.

The reading-room has been fairly well attended during the year, the average monthly number of magazines used there being 146, and of books, 56. The following periodicals and papers are always to be found there:

MAGAZINES.

Harper's, Atlantic, Century, Scribners', Lippincott, New England, Living Age, St. Nicholas, Wide Awake, Harper's Young People, North American Review, Popular Science, Magazine of Art, Art Amateur, Art Interchange, American Library Journal, Magazine of American History.

PAPERS.

Harper's Weekly, Scientific American, Literary World, Youth's Companion, N. Y. Semi-Weekly Tribune, Boston Daily Journal, Boston Daily Transcript, Norfolk County Gazette, Hyde Park Times.

In all 25,527 books have been given out during the ten months when the library has been open, making the circulation a trifle less than that of the year ending in 1885, which was the best on record. Probably, the circulation has been somewhat lessened, during the last two years, by the change in the rules fixing the minimum age at which children can take books at 14, instead of 12 years, as was the case before. Of the circulation about 80 per cent has consisted of fiction, 10 per cent of history, 5 per cent of travels, and 5 per cent of all other matter.

The number of new cards issued during the year is 291; the amount of fines, \$32.13; the number of books covered and re-covered, upwards of 1000, and those bound and re-bound, 266. The present value of the library fund is \$4930.80.

The librarians have performed their duties faithfully and conscientiously, and, so far as we are aware, to the satisfaction of the public.

In November last the resignation of Sylvanus Cobb, Jr. was tendered on account of continued ill-health, which, in his judgment, rendered him unable to give further service on the Board of which he had been, for so many years, a valued and efficient member. The regret felt and expressed by the trustees will be fully shared by the citizens of the town.

POLICE REPORT.

To the Board of Sclectmen: -

Gentlemen,—The following is a record of the arrests made during the year ending February 1st, 1887. Classified as follows:

Drunkenness .							37
Assaults .							15
Breaking and Enterin							6
Liquor Nuisance	1 .						IO
Keeping Liquor with	inte	nt to	sell				I
Vagrants .							25
Tramps							2
Embezzlement							I
Peddling without Lic							6
Cruelty to Animals							3
Setting Fire ·							I
Exploding Fire Worl	ζS						I
Larceny					٠.		2
Arrested and turned							
Insane persons comm	nitted	to H	ospit	als			5
							118
Number of search wa	arrant	s for	into	xicati	ing lie	quor	12
Cases investigated wi	ithout	arre	st				127
Stores found open at	night	t					4
Stolen property recov	vered					\$39	0.00

In adddition to the above, 1,069 travellers have been lodged in the station house over night, being discharged the following day.

There can be no doubt that the town needs a larger police force. The officers now under pay have conscientiously endeavored to enforce the laws, and have done as well as possible with the limited means at [their control; and with a good measure of success, yet with a larger force much more might be accomplished and the property of the citizens more thoroughly protected. The town would in my opinion, be fully compensated for the extra outlay occasioned by the increase.

CHARLES E. JENNEY,

Chief of Police and Keeper of Lock-up.

ENGINEER'S REPORT.

To the Honorable Board of Selectmen:-

GENTLEMEN:—Herewith we present our report for the year ending January 31st, 1887.

It is with great pleasure that we call your attention to the high state of efficiency in which our Department stands and we can truly say that each and every man has done his duty in a satisfactory manner to the board of Engineers.

The addition of a Fire Alarm System has thus far been of great help to the Department and cannot fail to prove valuable to the best interests of the town. As statistics show, the better a place is supplied in this respect, the incendiary fires correspondingly decrease. We would respectfully recommend the further increase of our alarm system by the addition of a Tower Striker on the Methodist church bell, and five street boxes. The present equipment of the Fire Alarm Telegraph is as follows: 8 miles of wire with Brackets Insulators, &c.: 5 Street Boxes; 1 15-inch Gong and Punch Indicator; 3 Tappers; 1 Battery; 30 Cells; 1 Galvonometer.

On the completion of the Hose House at Readville we stationed a hose wagon there fully equipped with hose, ladders, &c., and the company, under the command of Capt. James H. O'Brien, are in good condition to render effective service in their district, and also report at the Central Station at all alarms for fires which are out of their limits. The Hydrant Service we have found first-class in all respects.

The Apparatus belonging to the Town is as follows:

Two Steam Fire Engines.

One Chemical Engine, (double tank).

One Hook and Ladder Truck, (fully equipped).

Two Hose Carriages, (four wheel).

One Hose Wagon.

Four Thousand Feet of Cotton Hose, in fair condition.

Three Hundred Feet of Rubber and Cotton Hose for Chemical Engine.

Four Sets of Swinging Harness.

One Single Harness.

Two Shut-off Nozzles.

One Relief Valve, together with the requisite number of Play Pipes, Wrenches, Bursting Straps, Hose Lines, Lanterns, etc., etc.

The Engine House is in great need of repairs, and should be attended to at once in order to save the town a much larger sum in the very near future. We would urgently recommend an appropriation for 1000 feet of hose, for should we have a fire requiring several streams at once we would be crippled in that important respect from the start, and without a good supply of hose we cannot successfully fight fire. Because we have been so greatly favored by freedom from fires for the past two or three years let us not rest in fancied security, but be prepared to fight the enemy at all times, and bear in mind that every dollar (expended judiciously) for the Fire Department is money well invested.

Appended is a list of the officers of the several companies with the number of men in the Department.

Appended find list of fires for the year, with insurance and loss. The small number of fires as well as the very small loss is a matter of pride to the departments and should be so thought by the underwriters and citizens. When we have

more than two thousand wooden structures in the town and have only six fires in a year and a total loss of but \$1230, we may well take pride in the record and have it published that Hyde Park does not depend on kind neighbors for protection against fires as too many towns do to their shame.

Yours respectfully.

H. G. BALKAM, Chief Engineer.

R. WILLIAMS, Assistant Eugineers.

OFFICERS AND NUMBER OF MEN.

The following is a list of the officers of the several companies, together with the number of men in the employ of the department.

Hook and Ladder Co. No. 1.

ROBERT SCOTT, JR., Foreman.

WILLIAM HOLTHAM, Assistant Foreman.

ROBERT P. HOLMES, Clerk and Treasurer; and seven

CHEMICAL ENGINE.

HENRY I. SOMES, Foreman.

A. W. STORY, Clerk and Treasurer; and two men.

Hose Co. No. 1.

A. R. WILLIAMS, Foreman.

C. M. WANDLASS, Assistant' Foreman; and six men.

Hose Co. No. 2.

F. T. GREENLOW, Foreman.

M. ROGERS. Assistant Foreman.

J. T. GREENLOW, Clerk and Treasurer; and five men.

Hose Co. No. 3.

JAMES H. O'BRIEN, Foreman.

M. GALLIGAN, Clerk and Treasurer; and three men.

There are ten Substitutes, who are paid by the several Companies such compensation as they may direct.

M. J. FOLEY, Engineman.

JOSHUA WILDER, Steward.

JOEL F. GOODWIN, GEORGE SANFORD, GEORGE W. CHAPMAN.

Assessors of Hyde Park.

REPORT OF THE OVERSEERS OF THE POOR.

To the Citizens of Hyde Park:—

Before going into a detailed report of the receipts and expenditures in our department for the "town year" ending Jan. 31, 1887, we would state that the number of persons receiving aid (to any amount) is about the same as last year.

There has been more sickness requiring the attention of the town physician than for some years past, it being attributable, in several cases, to old age and its accompanying decrepitude. One person, Mrs. Michael Griffin, died Jan. 13th, 1887, after a long illness. A commendable feature in the case and worthy of mention is the fact that the husband, who survives his wife, and who, on account of feebleness, is wholly supported by the town, insisted upon paying the burial expenses out of a little fund which they had for some time been saving up for that purpose.

We would publicly acknowledge a contribution of \$25.00 from some generous person whose name is unknown to us, which was used by request to provide Thanksgiving dinners for the poor residing in our midst and which were gratefully received by the families thus provided for.

REPORT IN DETAIL.

HENRY S. BUNTON,

Treasurer Sinking Fund.

HYDE PARK, February 1, 1887.

AUDITORS' CERTIFICATE.

In compliance with the By-Laws of the Town, the undersigned have examined the accounts of the Selectmen, School Committee, Collector of Taxes, Town Treasurer, Commissioners of Sinking Fund, Trustees of the Public Library, Overseers of the Poor, and Board of Health, and hereby certify that the same are correct, and all payments accompanied by proper vouchers.

WALLACE D. LOVELL, CHARLES P. VAUGHAN, JOHN H. RUSSELL,

BY-LAWS.

At a meeting of the legal voters of the town of Hyde Park, Mass., held Dec. 14th, A. D. 1882, it was voted to adopt the following By-Laws, to wit:—

NOTIFICATION OF TOWN MEETING.

Every town meeting shall be notified by posting copies of the warrant calling the same, in ten public places in the town, seven days, at least, before the day appointed for said meeting;

ANNUAL TOWN MEETINGS.

The annual town meeting for the election of town officers shall be held on the first Monday of March of each year. The meeting shall be opened at seven o'clock A. M., and the polls shall be kept open urtil sunset.

A town meeting shall also be held annually between the first Monday of March and the first Monday of April, for appropriating such sums of money as may be necessary for town purposes, and for transacting such other business as may legally be brought before said meeting.

RULES FOR THE GOVERNMENT OF TOWN MEETINGS.

- 1. All questions submitted for the consideration of the town, involving the expenditure of money, shall be in writing, when so required by any legal voter.
- 2.—No vote fixing the period for closing a ballot shall be reconsidered after such ballot shall have commenced; but it may be in order to extend the period without such reconsideration.
- 3. When a question is under debate, motions shall be received to adjourn, to lay on the table, the previous question, to postpone to a certain time, to postpone indefinitely, to commit, or to amend; which several motions shall have precedence in the order in which they are herein arranged.
- 4.—The powers and duties of the presiding officer, not especially provided for by law, or by the foregoing rules, shall be determined by the rules of practice contained in "Cushing's Manual," so far as they are adapted to the condition and powers of the town.
- 5.—No vote shall be reconsidered except upon a motion made within one hour after such vote has passed, unless such reconsideration is ordered by a vote of two-thirds of the voters present and voting.

FINANCIAL YEAR,

The financial year of the town shall begin with the first day of February in each year, and end on the thirty-first day of the following January.

MEETINGS OF TOWN OFFICERS.

The selectmen, overseers of the poor, board of health, surveyors of highways, and school committee shall post in some conspicuous place at their official rooms, a notice of the times of their respective meetings.

COLLECTION OF TAXES.

- 1.—The assessment of taxes shall be completed, and a list of the same delivered to the collector, on or before the first day of August of each year.
- 2.— All taxes which may be assessed, if paid on or before the first day of October next after the assessment, shall be entitled to such discount as the town shall vote at its annual meeting. All taxes shall be due and payable on or before the first day of November next following the assessment of said taxes.
- 3.—On the first secular day of each month, the Collector shall pay over to the town Treasurer all the taxes collected by him; and he shall on or before the first day of February in each year, make up his account and render the same to the Auditors.

DUTIES OF THE AUDITORS.

- 1.—The auditors shall examine the accounts of the selectmen, school committee, treasurer, collector, trustees of the public library, and all other officers or committees entrusted with the expenditure of money, quarterly, and shall certify as to the correctness of the same in the printed annual report.
- 2.—Before certifying to the accounts of the treasurer, they shall examine his eash-book, wherein shall be entered his receipts and payments, as they occur from day to day, and see that he has paid out no moneys except on proper vouchers, carefully examine all payments for interest, and see that the funds on hand are intact.
- 3. Before certifying to the collector's accounts, they shall examine his cash-book, showing the amounts collected from day to day, and showing when the same were paid over to the treasurer; shall see that he has collected interest on all taxes overdue, and shall see a complete list of abatements, and also a list of unpaid taxes.
- 4.—They shall see that the accounts of the trustees of the public library are kept in a correct manner, and that all payments are accompanied with proper vouchers.

COASTING.

Coasting on any of the public streets of the town is prohibited, except upon such streets as the Selectmen may designate each year by public notice.

HIGHWAY AND POLICE REGULATIONS.

- 1.—No building shall be removed over a public street without the written permission of the Selectmen.
- 2.—The owner of such building, or the person or persons removing the same, shall give a bond in such penal sum, and with such sureties as the Selectmen shall determine, with condition to reimburse the town for all sums of money which it may be liable or compelled to pay in consequence of such use of the highways.
- 3.—No person except the Selectmen or the Surveyors of highways, in the lawful performance of their duties, or those acting under their orders, shall break or dig up the ground in any street or public way in the town, without first obtaining a written permit from the Selectmen; and all persons acting under such permit, shall put up and maintain a suitable railing or fence around the part of the street so broken up, so long as the same shall remain unsafe or inconveniut for travellers, and he or they shall keep one or more lighted lanterns fixed to such railing or fence, or in some other way exposed every night from twilight in the evening through the whole night, so long as such street or way shall be or remain unsafe or inconvenient for travellers.
- 4.—No person shall ride or drive a horse in any street in the town at a rate faster than eight miles an hour.
- 5.—No person shall, without the written consent of the Selectmen, play at any game in which a ball of any kind is used, or fly a kite, or throw or shoots tones, arrows, balls, snow-balls, or other missiles, or discharge any gun, cannon, or firearm, or make any bonfire or other fires in any street or way where the public have a right to pass.
- 6.—No person shall propel, drive, wheel or draw any bicycle, tricycle, cart or vehicle of any kind whatsoever except a child's carriage drawn by hand, nor use roller skates upon or over any sidewalk in this town, nor permit nor suffer any horse, cattle, swine or sheep, belonging to him or under his care or keeping to go upon or over the same, nor suffer any horse to remain hitched across, or upon, or otherwise obstruct or injure, any such sidewalk.
- 7—No person shall hitch or fasten any horse to any ornamental tree standing or growing on or near any sidewalk, or to the boxing or guard about said tree, without the consent of the owner thereof.
- 8.—No person shall without a written license from the Selectmen, place or caused to be placed, or suffer to remain within the limits of a

street or upon any sidewalk, so as in any manner to obstruct the travel thereon, any vehicle, wood, coal, mannre, dirt, gravel, stone, building material, barrels, boxes, merchandise, or any rubbish or obstruction whatever.

9.—No person shall carry in a public street, house-offal, either animal or vegetable, or grease, or bones, or the contents of cesspools or vaults, unless he has been expreesly licensed therefor by the Board of Health, upon such terms and conditions as said board may deem that the health and interests of the town require.

10.—Loud crying of wares or merchandise, or hollooing, hooting or making loud and unseemly noises on the public streets or squares of the town, to the annoyance of the citizens, is prohibited.

11.—No person shall behave in a rude, indecent, or disorderly manner, or use profane, indecent, or insulting language, in any public place, or on any sidewalk or street in the town, to the annoyance or disturbance of any other person there being or passing in a peaceable manner, or be or remain upon any sidewalk, street, or crossing, or about doorways or places of business, to the annoyance or disturbance of any person.

12.—Three or more persons shall not continue to stand or remain in a group or near to each other, on any sidewalk or street or crossing, or in any public place, in such a manner as to obstruct a free passage for foot passengers, after having been requested by a constable or police officer to move on

13.—No person shall be or remain in any doorway, or upon any stairs, doorstep, portice or other projection from any house or building or upon any wall or fence on or near any street or public place, after having been requested by the owner or any occupant of the premises or by any constable or police officer to remove therefrom.

14.—No person shall make any indecent figures, or write, print, paint, or cut any obscene word or words upon, or deface, break or injure in any manner, any fence, post, sign, street lantern, building or structure; or commit a nuisance upon any sidewalk or other place resorted to by the public, or against any tree, building or structure adjoining a sidewalk.

15.—No person shall extinguish any street light, or extinguish or remove any light placed to denote an obstruction or a defect in any street or way, without proper authority.

16.—No person shall swim or bathe in any of the waters within the limits of this town, so as to be exposed in a nude state, to the view of any person passing or being upon any railroad or street or in any dwelling-house in this town.

17.-No person shall intermeddle with any hydrant, gate, gate-box

or water pipe placed or located within the limits of any public way in this town, without permission from the Selectmen or the Hyde Park Water Company.

PASTURING OF CATTLE OR OTHER ANIMALS ON STREETS OR WAYS.

No person shall pasture any cattle, goat or other animal upon any street or public way in said town, either with or without a keeper, except withinthe limits of such way adjoining his own premises, and field drivers are instructed to enforce this by-law.

TRUANTS.

- 1 The town hereby avails itself of the several provisions of the statutes of this Commonwealth, now in force, relating to habitual truants and absentees from school.
- 2.—All children convicted of habitual truancy hereunder, and children between the ages of seven and fifteen years, residing in said town, and who may be found wandering about the streets or public places of said town, having no lawful occupation or business, not attending school, and growing up in ignorance, may be committed to the Lawrence Industrial School, at Lawrence, Mass., or to any house of reformation which has been or may hereafter be established by the County Commissioners of the County of Norfolk, or to any place provided by this town within its limits, for confinement, instruction and discipline.
- 3.— Two or more truant officers shall be appointed annually, whose duty it shall be to inquire into all the violations of the truant laws, and of the law relating to compulsory education, and to do all the acts required of them by the laws of the Commonwealth.
- 4.—It shall be the duty of every truant officer, previous to making any complaint under these laws, to notify the truant, or absentee from school, also his parent or guardian, of the offence committed, and of the penalty therefor, and, if the truant officer can obtain satisfactory pledges for the restraint and reformation of the child, he may, at his discretion, forbear to prosecute so long as such pledges are faithfully kept.
- 5 -- It shall be the duty of the School Committee, the teachers of the public schools, and the citizens generally, to aid the truant officers as far as possible in the discharge of their duties.
- 6. It shall be the duty of the truant officers to keep a full record of all their official acts, and make an annual report thereof to the School Committee who shall publish the same with their own report.
- 7. Nothing in these by-laws shall be so construed as to alter or impair the obligation and duty of teachers to enforce punctuality and regularity of attendance, and to preserve good order and discipline.

LIST OF TAX-PAYERS.

The names of all persons paying a tax on real or personal property shall be published annually in the town report, together with the amount of tax assessed upon each, and whether the same is paid or unpaid.

DUTIES OF TOWN CLERK.

The Town Clerk shall keep a file of all town reports, reports of all committees chosen by the town, and all original documents relating to the affairs of the town which may come into his possession; he shall, as soon as practicable, after any election has been held by the town, in addition to the notices he is now directed to give to officers who are required to take an oath of office, also issue a written or printed notice to all persons who have been elected to any other office, or chosen to serve on any other committee, stating the office to which such person has been elected, or the duties which such committee was chosen to perform.

CONTRACLS MADE IN BEHALF OF THE TOWN.

Every contract exceeding one thousand dollars shall be accompanied by a suitable bond for the performance of the same, or by the deposit of money or security to the amount of such bond.

ACTIONS AT LAW.

The Selectmen shall have rull authority, as agents of the town, to employ counsel to institute and prosecute suits in the name of the town, and appear for and defend suits brought against it, unless otherwise specially ordered by a vote of the town.

CONVEYANCING.

Whenever it shall be necessary to execute any deed conveying land, or any other instrument required to carry into effect any vote of the town, the same shall be executed by the Selectmen, or a majority of them, in behalf of the town, unless the town shall otherwise vote in any special case.

BY-LAWS IN RELATION TO THE PREVENTION OF FIRES.

- 1.—It shall be the duty of every person who shall commence the erection of any building within the town of Hyde Park to notify the Board of Engineers thereof before he shall commence building the chimneys therein.
- 2. All chimneys in wooden buildings shall be built of brick, stone, or other fire-proof non-conducting material. All brick flues shall be smoothly plastered *inside* with mortar from top to bottom, or lined with earthen pipe, and shall be plastered *outside below the roofing*.

3.—In no case shall chimneys rest upon any flooring without a footing of masonry or iron supported by iron beams, having a secure bearing of masonry or iron supported by iron beams, having a secure bear-

ing of masonry or irou at either end.

4.—All flues shall be topped out at least four feet above the roof of the building to which they belong. The brick topping out of chimneys shall not have more than two inches projection unless covered by a cap of metal or stone properly secured.

5.—Hearths or fireplaces or grates shall be laid upon brick or other trimmer arches, or upon bars of iron supporting a bed of brick work.

- 6.—No wood-work of any kind shall be placed at a less distance than one inch from the outside brick work of any flue. In no case shall a nail be driven into the masonry of any flue.
- 7.—No wood-work shall be placed at a less distance than one inch from any tin or other metal flue or flues, pipe or pipes, used or intended to be used to convey heated air or steam in any building, unless such flues or pipes shall be cased with metal, leaving a free circulation of air all around the same.
- 8.—No smoke-pipe in any such wooden or frame building shall hereafter enter any flue, unless the said pipe shall be at least twelve inches from either the floors or ceiling; and in all cases where smoke pipes pass through stud or wooden partitions of any kind, whether the same be plastered or not, they shall be guarded by either a double collar of metal, with at least four inches of air space and holes for ventilation, or by a soap stone ring, not less than three inches in thickness and extending through the partition.
- 9.—The Board of Engineers shall examine into all shops and other places where shavings or other combustible material may be deposited or collected, and at all times be vigilant in the removal of the same, whenever, in the opinion of a majority of them, the same may be dangerous to the sceurity of the town from fires; and direct the owner, tenant, or occupant of said shops, or other places, to remove the same; and in case such owner, tenant, or occupant refuses or neglects so to do, shall cause the same to be removed at the expense of such owner, tenant, or occupant.
- 10.—It shall also be the duty of said Engineers to take cognizance of all buildings in the town in which any steam engine shall be used, and of all buildings in town in process of erection or alteration, and to make a record of such buildings as in their judgment may from any cause be dangerous, and report the same to the Selectmen forthwith. And whenever in the opinion of a majority of the Board of Engineers, any chimney, hearth, oven, stove, stovepipe, fire-frame or other fixture, or any camphene or other explosive or inflammable fluid or material, or whatever else may give just cause for alarm, should be

altered, repaired or removed, they, the said Engineers, shall forthwith notify and direct the owner, tenant or occupant of the premises upon which the same are situated, to alter, repair or remove the same, as the said Engineers shall direct. And in case such tenant, owner or occupant shall refuse or neglect so to do, the said Engineers shall cause the same to be removed, altered or repaired at the expense of such owner, tenant or occupant. And any person who shall obstruct the Engineers, or any of them, in carrying out the provisions of this section, shall be liable to the penalty hereinafter stated.

11.—The removal, extension or essential alteration of any building; also the rebuilding or repairing of any building which has been partially destroyed by fire shall be subject to the same restrictions as are imposed by the foregoing By-laws on the erection of buildings.

PUBLICATION OF BY-LAWS.

The Selectmen shall publish these By-Laws annually in connection with the town report.

PENALTIES UNDER THE BY-LAWS.

Every violation of any of the foregoing By-laws shall be punished by a fine of not less than one dollar nor more than twenty dollars, to be recovered by complaint before any trial justice in the County of Norfolk, or any other court having jurisdiction.

PROSECUTION UNDER THE BY-LAWS.

Any citizen may, and the selectmen, constables and police officers shall, prosecute every violation of the foregoing By-laws, by complaint before any trial justice in the County of Norfolk, or any other court having jurisdiction.

LIMITATIONS OF ACTION.

No person shall be prosecuted or tried for any breach of the provisions of any By-laws of this town, unless the complaint for the same shall be instituted and commenced within six months from the time of committing such breach.

All By-laws or parts of By-laws of this town heretofore existing are hereb; repealed, and these By-laws of the town of Hyde Park shall go into effect from and after their adoption by the town and their approval by the Superior Court or any Justice thereof.

Commonwealth of Massachuseits. Norfolk, SS.

HYDE PARK, November 17, 1886.

At a meeting of the legal voters of said town of Hyde Park, held in Everett Hall, on Wednesday the seventeenth day of November, in the year of our Lord eighteen hundred and eighty-six, the foregoing Bylaws were adopted by said town.

Attest:

HENRY B. TERRY, Town Clerk.

Commonwealth of Massachusetts, Norfolk, SS.

Superior Court, December Sitting, 1886, To wit: January 26, 1887
The foregoing By aws are hereby approved.

By the Court.

ERASTUS WORTHINGTON, Clerk.

True copies. Attest:

ERASTUS WORTHINGTON, Clerk.

REPORT OF THE SCHOOL COMMITTEE.

TO THE CITIZENS OF HYDE PARK:

At the beginning of the year your Committee effected the following organization:—

CHARLES G. CHICK, Chairman. Benjamin C. Vose, Secretary.

For convenience sub-committees were then appointed and approved by the Committee, namely:—

High School.—George M. Fellows, Andrew Washburn, Benjamin C. Vose.

Grew School. - James E. Cotter, Benjamin C. Vose.

Fairmount School. — Andrew Washburn, Edmund Davis.

Greenwood School. - Edmund Davis, James E. Cotter.

Damon School. — Charles G. Chick, George M. Fellows.

Butler School. - Benjamin C. Vose.

Evening School. — James E. Cotter, Andrew Washburn.

Industrial School. — Andrew Washburn.

With this organization the work of the Committee has been harmonious, and no effort has been spared to provide the best accommodation and facilities for the comfort and education of the children, consistent with the exercise of that degree of economy made desirable by the present tax rate of the town.

In this connection we are pleased to report that the generous appropriation of last year has enabled us to employ good teachers, open new schools when necessary, and to keep the buildings well warmed and in good repair during the year.

We are further able to say that the unexpended balances standing to the credit of this department, are sufficient, if so applied, to meet all outstanding obligations.

It seems proper at this time to call your attention to certain matters which have received attention, during the past year, and to make some suggestions as to the future needs of this department.

HIGH SCHOOL BUILDING.

For several years past, and especially since the school-room has been enlarged, it has been difficult to warm the various rooms, during the winter weather, so that at all times they would be comfortable for the students in attendance. Last year a special appropriation was made to furnish better facilities for heating and for other needed repairs. The expenditure of this appropriation was referred to the subcommittee in charge of this school; and during the summer vacation two new furnaces were substituted for the old ones, and other needed improvements were made.

The result of the change in furnaces is very satisfactory, and the building itself is in good repair. The yard and fence, however, are not in a suitable condition, and will demand attention the coming year.

FIRE ESCAPES.

In June, 1883, the Legislature enacted a law providing that "all school buildings, three or more stories high, and accommodating, or having the means of accommodating thirty or more persons, . . . shall be supplied inside thereof, with proper and sufficient means and appliances for escape in case of fire, or apparatus for that purpose, properly constructed upon the outside thereof, connecting through doors or windows," etc.

At that time the large hall on the third floor of the Grew Building was occupied by Mr. Dean's classes, then numbering upwards of sixty pupils, and the Committee at once considered the matter of placing escapes upon this building, and experiments were made.

In the summer of 1884 the annex was built and occupied by Mr. Dean's classes, and the hall was vacated. The third floor of the building has not been used permanently, until about a year ago, when it was found necessary to transfer the sixth class to the upper room in the addition, which it now occupies. The occupation of this room rendered a fire escape necessary. While experimenting at the Grew Building, the matter of furnishing additional means of exit at the High School building had been considered but no action taken. In the summer of 1885, the number of pupils having increased to above one hundred, it became necessary to enlarge the room for their better accommodation. The stairways leading from this large room, often filled with students, being narrow, the means of escape, in case of accident, seemed inadequate.

Last Spring the town made an appropriation for the purpose of providing the two school buildings, above-named, with fire-escapes. The matter was at once referred to the sub-committee having these buildings in charge, and a careful investigation was made by the gentlemen of those committees.

After full consideration of the merits of the various systems, and with the approval of the full Committee, the system in use in many of our neighboring cities and towns was adopted, and during the summer vacation escapes were placed upon the outside of both the Grew and High School buildings. The fire-escapes consist of iron platforms and stairways, protected by strong railing of the same materials, all firmly fixed to the outside of the buildings, and afford a safe and convenient means of exit in case of necessity. They have been inspected and approved by the Inspector of Buildings.

WATER.

During the year contracts have been made with the Hyde Park Water Company, and water has been introduced into the High, Grew and Fairmount School buildings. The cost of introducing the water into these buildings appears among the expenditures of this department. This improvement insures a supply of pure water for use in these schools, and is much appreciated by teachers and pupils. The annual cost to the town is \$25 for each building. We recommend that water from the same source be supplied at the Greenwood and Damon schools in the near future.

HEATING.

The subject of heating our large school buildings demands careful attention. Many of the furnaces which have been long in use will soon need to be replaced by new ones. It would be well to consider the subject of steam heating before making any large expenditure for new furnaces in any one building, as no change of system should be made until a careful investigation as to the comparative merits of the systems in use is had, in order that no mistake be made in this important matter.

Your Committee would suggest the appointment of a special committee to examine this subject, that all the facts may be obtained and placed at the disposal of the town.

ACCOMMODATIONS.

The growth of the town is nowhere more clearly evidenced than by the rapidity with which the large buildings provided by the town for school purposes are being occupied. Thirty-six rooms, in various parts of the town, have been provided for the Grammar and Primary schools, and with one exception they are now used by the schools.

Additional accommodations must be provided at an early day. This matter should *at once* receive the careful con-

sideration of the town, that the future requirements of the schools may be met with as much advantage to the town as possible.

INDUSTRIAL SCHOOLS.

There is a strong belief among educators of the present day that the hands should be educated to be useful, and that national success depends largely npon the training of skilled laborers. Our townsman, Henry A. Grew, Esq., being interested in this subject, generously presented this department with a number of carpenter benches and the necessary tools, in order that a School of Carpentry might be opened as an experiment. A school was opened for a short time last year with good success.

In view of the importance of this subject, and the interest displayed by the pupils who attended the school while open, your committee feel justified in recommending a small appropriation for the support of this school during a part or the whole of the coming year.

SUPERVISION.

The supervision of the schools during the past year has continued in charge of Mr. David Bentley, Superintendent of Schools. In the performance of his duties he has had the co-operation of this Committee, and his suggestions have at all times received respectful consideration.

It has been his province to examine and recommend teachers, visit and examine the schools, to make promotions, purchase all the books and supplies, and generally to be familiar with the condition of the schools. His report to this Committee upon these matters is herewith submitted for your careful consideration.

Respectfully submitted, in behalf of the School Committee,

CHARLES G. CHICK, Chairman.

SUPERINTENDENT'S REPORT.

To the School Committee of Hyde Park:

Gentlemen,—The following report is respectfully submitted:—

EXAMINATIONS.

One of the most difficult things connected with the conduct of our Public Schools is to decide upon the frequency, character and value to be attached to the examinations. doubt, in many instances, too much time is spent in the endeavor to discover what the pupil knows or what he does not know rather than in the legitimate work of imparting instruction. The present hue and cry against examinations is simply a reaction against an excess rather than a condemnation of all tests. Most thoughtful schoolmen are agreed that under the present constitution of our schools some way of testing the quality and extent of the work is indispensable. As I have said, the practical questions to be determined are, their frequency, character, and the influence they should have in determining the pupil's rank and promotion. During the past school year I have prepared written questions for three examinations. One of these was held in December at the close of the fall term, another at the close of the winter term at the first of April. Two of the examinations, of which there are five during the year, are in the hands of the teachers and are based on the daily work of the pupils. One of these applies to the months of September and October, the other to the work of January and February.

These four examinations are averaged and the results combined with the third written examination held in June, the result of which determines, in a large degree, the annual promotion of the pupils. This method, while attaching special importance to the June examination, still brings into account the pupil's record for the whole year. The only question would seem to be whether too much value is not given to the June examinations.

I am well aware that the character of the tests applied governs, in a large degree, the character of the teaching. If questions are framed testing the student's knowledge of the principles in their practical application, and going possibly a little outside the narrow limits of the text-book, the tendency is to broaden the range of teaching, while, on the other hand, if you follow loyally the well-beaten track of "thus saith the book," the result is compression, a narrowing of the general scope of investigation, with but few excursions into the regions beyond. The teacher and the pupil both need the stimulus which comes from well directed investigation. It gives variety, reality and freshness in their work, and the tests applied should lead in this direction. I believe such a method of examination as we have carried out the past year forms a comparatively safe basis for promotions. Exceptional cases, however, will frequently arise, and should always be carefully considered.

All the members of the graduating classes of the Grammar Schools in June received diplomas, seventy in all. Fifty of these became members of our High School in September, making, I believe, the largest entering class in the history of this School.

The promotions through all the grades were made in accordance with the required standard, with the exception of one or two rooms, in which frequent changes of teachers had taken place, with the usual result of lowering the standard of scholarship for the time being. I see no good reason to change our present method of conducting the examinations. They have the advantage of being uniform, the same questions being used in corresponding grades in all the schools. The results on the whole have been satisfactory, showing no marked difference in the several schools. In some cases a few have been left behind, as the result of irregular attendance or the want of interest or ability on their part.

The annual examination of candidates for teachers was held on the 21st of August. An extended notification was given through our local press and in Boston papers, and in addition to these quite a large number of personal notices were sent, all of which contributed to the bringing together of a much larger number than last year.

The questions prepared for this examination covered, in a general way, the studies in our Primary and Grammar schools, and had also special reference to methods of teaching and school management.

This examination brought together a class of young ladies who were generally well prepared for their profession, so far as a knowledge of the subjects is concerned, but the examination of those having a professional training such as is furnished by our best Normal Schools was very much more satisfactory with reference to methods of instruction and general school management. This difference was very marked, and, in my judgment, should have a controlling influence in the choice of teachers for our schools. There is such a thing as science in teaching, as a normal method of instruction, as a natural development of the power of the mind.

Nineteen young ladies successfully passed this examination, and their testimonials being satisfactory, by your vote, their names have been added to the approved list of candidates for teachers. It gives me great pleasure to say that two of this number were graduates of our own High School in the class of last June. One of these, Miss Louise L. Sears, after assisting without remuneration during the Fall term in the Damon School, has now received a regular appointment as teacher in the same school. The other, Miss Grace B. Gidney, in a similar way, has been assisting in the Greenwood School, and has recently received the appointment as assistant of the Principal of that School. Two others of this number, both graduates of the State Normal School at Salem, have been teaching in the Grew School since September 1st, Miss Clara M. Colcord in the eighth class and Miss Bertha E. Messer in the twelfth. Both are doing well

Our schools are suffering in a very marked degree from the frequent loss of our more experienced and successful teachers. Hyde Park is regarded by the school officers of our neighboring eities and more wealthy towns as most excellent foraging ground, and so month by month we are called to say a professional good-bye to those whom we would gladly retain for the sake of our schools, but in whose increased material prosperity we cannot but rejoice At the rate of change for the past year, our entire teaching force would be renewed every four years. The remedy is not far to seek, but whether it can be applied in our present circumstances as a town is for you, gentlemen, to decide. I should hope that at least an effort might be made to retain our experienced and valuable teachers.

The town is fortunate in having at the head of her High and Grammar Schools men of experience and ability. I hope the time is near at hand when these gentlemen shall receive a compensation more nearly commensurate with the value of their services.

In my report of last year I spoke somewhat at length upon the several subjects of study in our Primary and Grammar schools. At present I believe this to be unnecessary, as most of the suggestions then made you have since authorized me to carry out.

The text-book in Arithmetic heretofore in the hands of the pupils of the eleventh class has been discontinued. It was found the scholars could not read sufficiently well to comprehend the written statements of problems. At present the work of this class is simply an extension of the method of the first year, namely, familiarizing the pupil with the four operations on numbers as far as fifty. This is done, in the first place, by the use of objects in the hands of both teacher and pupil, so that the conception of what is done may be as vivid and real as possible, the purpose being to do away with the use of objects as soon as the child is able to grasp the abstract notion of numbers. This plan gives much more time for drill in oral and slate work, and, we believe, will result in greater facility and accuracy in the handling of small numbers. The results secured in the study of Arithmetic in

our elementary schools are probably less satisfactory than in any other study. We are apt to become impatient, forgetting that the power of abstract reasoning is of later development than most other faculties of the mind.

Until the present year the course of study in Geography has extended through a period of six years. In September last we commenced on a five years' course, the text-book being first used in the ninth class instead of the tenth.

I believe that, with the use of one text-book containing only the essentials to be memorized, and with good physical wall maps, the time might with advantage be reduced to a four years' course. With such a plan in operation our present text-books could be used for reference and general reading on the subject. It would also give time for the fifth class to take up the subject of Physical Geography or English History.

The introduction of Barnes' U. S. History into the three upper classes of our Grammar Schools a year ago has proved highly satisfactory. The topical arrangements of the subjects, the numerous maps and copious foot-notes, the many beautiful illustrations and portraits, leave little to be desired in the way of a first-class text-book.

The course of study in Languages and Grammar has been modified as you directed, the Elementary Grammar being discontinued in the seventh and eighth classes and the larger Grammar, which has been used only in the fifth and sixth, is now begun in the seventh class. I believe, on the whole, this was a movement in the right direction, though I still think the seventh class could be more profitably employed in simple practice in the use of language, rather than in the more formal study of its grammar. I regard the subjects as fundamentally distinct, one being the practice in the use of the language either oral or written, with the purpose to become fluent and correct in its use, while the other pertains to the scientific examination of written composition to ascertain its conformity with certain established rules. A man may be utterly

ignorant of anatomy and yet be a skilled gymnast, so it is possible to become skilled in the use of language without a knowledge of its grammar. The student, of course, needs both, but in this practical age, for the average man, it is more important to know how than to know why. With a well-arranged preparatory course in Language, which would give to the student facility and correctness in oral and written expression, the study of grammar, as such, need not occupy a very large amount of time. In this connection I wish to call your attention to the need of a greater variety of books suitable for use as the basis of Language work. These books should be interesting and instructive, but not scientific, in their character, such as books of travel and stories, so that the pupil's mind may be free to clothe his ideas in the best possible manner, and not be burdened with the effort necessary in making an exact statement of fact. A few books of this kind have been furnished, and more are needed.

Some additional reading matter of a very simple kind has been provided for the first and second year in the Primary Schools, and with excellent results. These classes need a great deal of practice in reading which comes within the range of their understanding, in order to encourage ease and naturalness of expression.

The work in Spelling has been changed, one book only being used, and beginning with it in the tenth class. This arrangement makes the work systematic and progressive throughout. Teachers are encouraged to have their classes spell orally a part of the time, thus giving variety, and also a rapid way of reviewing.

In accordance with the law of the State, instruction in Physiology and Hygiene is given in all our schools. A good degree of interest is shown by teachers and pupils. The regular examinations in these subjects show that intelligent and thorough instruction is given. So far as a knowledge of the evils of intemperance is concerned, the pupils, even in our Primary Schools, are fully advised. But this knowledge,

I fear, will avail but little unless supplemented both by precept and example, so that the moral nature of the child may be so developed and strengthened as to lead him to resist temptation to indulgence in any form of evil. Such a result we can only hope to reach through the combined influence of a good home, a good school, and proper Sabbath and church training. A person thus trained should have within himself the elements of safety; the very warp and woof of his inner self should lead him to choose the right and avoid what is vicious. Some one has said that such a character "is the highest product of education, and its attainment the best and surest safeguard to society; more potent as a conservator of virtue and morality than fear of all the pains and penalties which reality can present or imagination can picture."

I desire to call your special attention to a course of instruction in drawing prepared by Mr. Charles M. Carter for primary and grammar schools. It coverse a period of eight Mr. Carter is in the employ of the State Board of Education, having the subject of drawing under his supervision. This course has been prepared with reference to its adoption by the cities and towns of the State. In a note introducing the course the author says: "Industrial drawing as here presented is regarded by many educators as the foundation of industrial training. It gives skill in the use of hand and eye. Drawing and designing are here combined with the construction of objects." This method begins with the examination of simple forms, such as the cube, cylinder and sphere. The pupil is taught to observe, to use his eye and hand in making the object out of clay or some other convenient substance, and then to construct a drawing of it. This plan is followed through the entire course, so far as possible. The result is the pupil gets his knowledge first-hand, what he sees he is able to draw. Our present work is simply copying from flat drawings which have no connection in the mind of the pupil with the objects themselves, and gives

to him no power to draw what may be placed before him. The adoption of this or a similar course, with the aid of a special teacher to introduce it, would, in my judgment, give practical value to our work in drawing.

HIGH SCHOOL.

The present classification is as follows:

First class				19
Second "				16
Third "				28
Fourth "				47
Whole numbe	r .			110
Second Year's	Busines	ss Course		7
First "	"	"		I 2

During the past year the work of this School has been carried on without interruption by change of teachers.

The graduating class numbered twenty, fifteen having taken the four years' course and five the two years.'

Three of these graduates successfully passed the entrance examination for college, one at Harvard and two at Boston University, in each case without conditions, and one with honors. Two others entered the Institute of Technology also without conditions. Such results are very creditable to the school and furnish good evidence of the character of the work so far as the purpose of the school is to prepare students for advanced study.

In regard to the two years' course little can be said in commendation. Observation of the work done the past year confirms me in my opinion expressed in my last report, that it is at best "a poor substitute for a thorough education."

Mr. Martin, of the State Board of Education, in his report upon the high schools of the State says: "This short course meets with little favor from either pupils or teachers. I have found but one teacher who shows any decided interest in it. Few students choose it, and these, I have been told, are usually of the weaker sort. So far as the true end of High School instruction is concerned, I consider the course almost valueless."

A thorough *English Course* of three years, which would include practical business instruction, would undoubtedly be a great improvement upon the present two years' Business Course, and, I believe, would meet with general favor. It would give the student time for a better general preparation and hence, increase the probabilities of his success in life.

MUSIC.

In introducing to you the report of the Instructors of Music in our Schools, I am glad to bear testimony to their earnest efforts in awakening an increased interest in this subject. Its importance, as a branch of school instruction, is more and more fully recognized, and also the need of more systematic work based on true educational principles.

To the Superintendent of Schools:

At the beginning of the September term, a printed course of instruction in vocal music for all grades, including the high, was placed upon the desk of each teacher.

The object in preparing this course was to systematize the method of teaching in the several grades, thereby enabling teachers to examine and classify their pupils in music as is done in other studies.

This plan has already been attended with beneficial results.

For several years past the grammar school graduates, upon entering the high school, have been examined individually, and it gives me pleasure to state that a much larger per cent were able to pass the examination for entrance into the advanced class in music this year, than ever before.

In the primary schools, both teachers and pupils have manifested great interest in the music lessons,—consequently some excellent work has been accomplished.

Adopting the theory that "practically every child may learn to sing," no pains have been spared in awakening and developing tone perception in the naturally unmusical children, and the results are certainly very gratifying.

Respectfully submitted.

HENRY J. WHITTEMORE, MARY E. WHITTEMOER, Instructors in Music.

EVENING SCHOOLS.

Organization,—Committee, J. E. Cotter, Andrew Washburn. Teachers, S. W. Culver, Principal; Wales B. Stockbridge, Jr., Assistant.

The regular winter term of this school closed about the middle of March, but, at the special request of a class of young men connected with our manufacturing establishments, it was reopened and continued through the spring and early summer with good results.

The present session of this school began November 8th, in the Damon School house. Some sixty-five persons joined the school during the first two weeks, but the attndance rapidly fell off so that up to the Christmas vacation the average attendance did not exceed seventeen. Upon inquiry it was found more convenient for those who attended most constantly to meet at the High School house. Under these circumstances permission was granted by your committee for its removal to the High School building, where it opened January 3d. The change has resulted in an increase in the average attendance to over twenty, and the school is now in a prosperous condition.

EVENING DRAWING SCHOOL.

The following report by Mr. H. W. Killam, the teacher of this school, is of so much general interest that I submit it for publication. This school deserves commendation. The young men appreciate your generosity in sustaining it, and are improving its opportunities by regular attendance and faithful application to study.

To the Superintendent of Schools:

On the opening evening, Nov. 8th, over forty persons presented themselves. As only three wished to take up architectural study it was decided not to form a class in this branch of work. Three classes were formed, each meeting once a week.

The elementary class, meeting on Friday evening, commenced the study of practical geometry. passing from that to Prolection: There have been from twelve to twenty pupils present at each session.

The intermediate class, meeting on Wednesday evening, have studied various details of machinery. The construction of screws, elementary study of toothed gearing, cams, etc. There have been from twelve to eighteen pupils present at each session.

The advanced class, meeting on Monday evenings, devoted its time to the special study of toothed gearing, comprising cut or finished spur, bevel and worm gears. There have been from eight to thirteen pupils present at each session.

The majority of the pupils are apprentices or young journeymen employed in the various manufactories in town, with several from the public schools who have a taste for mechanical work.

The aim has been to make the work thorough and practical, the advanced course being founded on the practice of one of the largest machine tools works in the country. While it is not expected all will make drawing their profession, still the knowledge obtained in this course will be of great advantage to them in any mechanical work they may vish to follow.

The results of the work in the past are seen in the cases of several of our pupils who are receiving considerable more wages than they would if they had not received this preparatory instruction.

I would recommend an increase in the appropriation for the support of the school, so as to enable the formation of a class next winter for the study of machine construction and design.

A class in architectural drawing would seem desirable, but our experience in the past has been that we must rely more on machinists then carpenters to support such a class.

HORACE W. KILLAM.

The "Industrial School" for the instruction of boys in simple carpentry was opened in April and continued through May and June. It was also opened in July and continued to the middle of August as a, vacation school. Both terms were fairly well attended, especially the latter, and many of the boys acquired considerable skill in the handling of tools and the construction of pieces of work. I believe the school supplies an actual need and should receive the support of the town.

Our efficient truant officer, Mr. P. S. Conlan, is doing good service in the way of preventing truancy and also in returning to school occasional wanderers. He reports sometimes finding children whose parents are unable to provide them with suitable clothing for attending our schools. These are generally the children of parents not having a legal residence in town. Some method of supplying their necessities should be provided.

I desire to call the attention of the Committee to the

immediate need of increased school accommodations and also to the subject of the proper warming of our school buildings. In connection with this last subject I should hope that the proper ventilation of our school houses would receive careful consideration. In our attempts to keep out the cold by outside windows and storm doors we increase the necessity of special provision in this direction. Only during a small part of the school year is it safe to open freely the windows. An abundance of warm, pure air is an absolute necessity to the health and comfort of growing children. This breathing over and over again the vitiated air of our school-rooms is, undoubtedly, a far greater and more permanent injury to our children than the very occasional falling of the thermometer to below 68°. Some means should be provided for an ample supply of pure warm air. This can be done by means of heated ventilating shafts or chimneys connected with the various rooms. They require to be heated to secure proper circulation. The rooms should also be provided with registers properly located for carrying off the impure air.

It has been my purpose during the past year to study and observe the best methods of instruction for public school purposes and to use these, so far as possible, in the improvement of our system of education. A good teacher is the great essential to a good school. In filling the vacancies which have occurred, I have tried to inform myself as fully as possible in regard to those I have recommended for your choice. They are all doing satisfactory work, with promise of increasing usefulness.

Our schools are not deteriorating, but positive progress is being made, giving proof of better things to come.

I wish to commend the teachers for their fidelity to the important trusts committed to their care and their hearty cooperation in all that pertains to the well being of our schools.

I gratefully acknowledge the courtesy and consideration shown me by you, gentlemen of the school committee.

REPORT OF SCHOOLS.

REPORT OF ATTENDANCE AT THE HIGH SCHOOL FOR 1886.
